

Pafilia presents the Domus Contemporary Living Project

Pafilia Property Developers, renowned for its dedication to excellence and its highly desirable luxury properties adds another contemporary development to its extensive portfolio, **Domus** in Pafos. Pafilia has collaborated with the acclaimed local architectural firm LK Architects, to create this stylish residential development which enjoys an enviable location in the picturesque village of Tala, on the outskirts of Pafos.

Construction of the project is well underway; 50% of the works are complete with an expected delivery date of December 2018. Domus is comprised of 59 properties, including 1 and 2 bedroom apartments with large verandas and 3 and 4 bedroom penthouse suites. Additionally, the development offers 10 beautiful 2-bedroom townhouses.

The spacious modern residences are aligned with Pafilia's long-standing reputation for delivering highly desirable luxury properties built to the best possible standards.

Domus blends contemporary architecture with traditional Mediterranean features characterised by domed roofs, terracotta tiles and stone. Through innovative use of the gentle gradient of the plot, the architect has ensured that each property enjoys optimal views of the sea and surrounding countryside.

Situated in Tala, a traditional Cypriot village and a sought-after residential suburb of Pafos, known for its cool breezes and spectacular views, Domus offers residents an ideal Mediterranean home.

Simos Simillides, Sales & Marketing Director of Pafilia, stated: "Domus is a great addition to our portfolio; it offers contemporary affordable homes in a beautiful setting with fantastic views and expansive relaxation facilities. The design recognises the emotional and practical priorities of prospective buyers; it provides buyers with a balanced, relaxed lifestyle product. Most importantly, it allows the further expansion of our wide portfolio of impressive property developments that cater to each client's unique demands."
